UV FILTERS

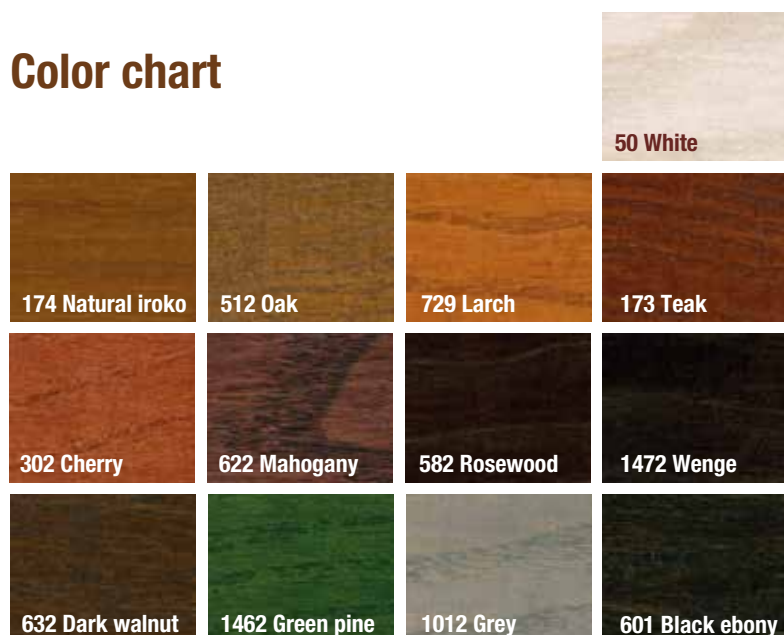

TERRACEOIL

Plus:

- Special natural oils mixture for the treatment of terraces and decks with excellent wetting properties on exotic woods
- Special formulation with low viscosity to grant deep impregnation properties and good timber protection
- With UV filters and additives against harmful agents
- Extremely easy to spread even if tinted
- Non-peeling, it does not require intermediate sanding
- Extremely easy maintenance (no sanding required)
- Special range of waterbased cleaners and special application brushes available
- Dedicated colouchart

Color chart

Exteriors

Oil

- Remove all the residuals of grease and old lacquers

- Apply the first coat by brush

- Wait the product to be absorbed; if possible let dry for 10-12 hours

- No intermediate sanding required

- Apply the second coat.

- Total drying in 12-24 hours

- Maintenance: remove dust and dirt and apply a new coat.

◇ (Being oil naturally oxidative, application may follow wet on wet, after 15-30 min from first coat, speeding work. This will influence final coverage and it will take 18-24 hrs for complete drying)
